

## PRESS INFORMATION

### **Made 2 Measure – Professional Shower Solutions for Professionals**

*March 2016*, AQATA, the design and engineering led producer of premium shower enclosures and screens, has been successfully manufacturing in Britain since 1986.

In addition to a network of approved UK bathroom retailers, Aqata works closely with luxury house builders and developers, prestigious hotels, leisure complexes and luxury boat builders delivering comprehensive shower solutions for some of the most challenging spaces. With extensive experience across these sectors, in both the UK and overseas, the company is able to make life easier when it comes to specifying the perfect product, no matter the size or scale of the project.

With three unique shower enclosure collections reflecting both contemporary and traditional styles, practical and innovative design solutions are available to suit every build. Working with the highest quality materials, clear toughened glass and high quality polished chrome profiles, hinges and handles combined with innovative concealed engineering ensure a luxury seamless finish on all shower screens and enclosures.

As projects often have different design, space and budgetary constraints that require a unique solution, Aqata's comprehensive **Made 2 Measure** service is available across all three extensive shower enclosure ranges. This allows the freedom to create bespoke and personalised designs to suit the most exacting requirements.

With 30 years of expertise in bathrooms, all models are designed and built to order, using skilled experienced craftsman at the company's dedicated factory in Hinckley, Leicestershire. Quality shower screens and shower enclosures can be created for special heights, widths or angles. Angled doors and screens make the most of sloping ceiling and notched panels are perfect for incorporating a built-in shower seat or integrated vanity area. Many bespoke enclosures are suitable for power showers, body jets and steam.

For an individual touch, Aqata offer an in-house glass etching facility. Screens, doors and panels can be etched to suit individual design requirements, such as corporate branding or logos. Decorative gold finish profiles are also available as an alternative to chrome, for those looking for a period or classic bathroom design.

A highly experienced team of professional advisers is able to offer unparalleled levels of technical and customer support every step of the way. In addition, Aqata can arrange for an experienced engineer to carry out a bespoke survey (and installation service) if required, to confirm the exact specifications and to help make key decisions to ensure the best results.

Creating products that will bring lasting quality to the bathroom for many years to come is a priority for Aqata. Every shower enclosure and screen is supplied with ClearShield ECO-GLASS™ protection as standard to help keep the shower looking newer for longer and for complete peace of mind, all models are delivered with a life-time guarantee.
