## Design Guild Mark for Kyoto

Morgan is delighted to have been awarded a 2016 Design Guild Mark for their Japanese inspired Kyoto collection. Designed by Morgan Studio, Kyoto is a system of linear benches that interlock to create informal seating. It is fully upholstered and features timber, glass or marble table tops.

Set-up to reward excellence in the design of volume furniture production, the Design Guild Marks are awarded by a distinguished panel of judges from the fields of furniture, hospitality, commercial, retail and media. There were a record number of entries again this year which were assessed for excellence in design, the use of materials, manufacture and function.

Morgan Managing Director, Rodney McMahon, comments, "This is our seventh Design Guild Mark since they were introduced by The Furniture Makers' Company in 2008. This one is particularly satisfying as it underlines our successful growth into the workplace sector, for which these benches are a great solution for receptions, presentation areas and adhoc meetings."
